

Team Save Your Skin

# Volunteer Guide

Would you like to support the work of SYSF? Here are 10 simple actions you can take to help make a difference.

## Follow

Follow our **Facebook page**, **Twitter** account and **Instagram** account. Like, comment on and share our posts as often as possible.

## Join

If you are a melanoma or ocular melanoma cancer patient or caregiver, join our **Melanoma Connect** or **Ocular Melanoma Connect** Facebook groups and take part in the conversation. Ask questions, post updates on your situation and respond to other people's posts whenever possible.

## Write

Write **blog posts** we can publish on our website to share patient, family and caregiver experiences related to skin cancer.

## Fundraise

Use your birthday or another special occasion as an opportunity to fundraise for Save Your Skin by doing a **fundraiser** on Facebook.

For more information on how to proceed with any of these actions, email [marianne@saveyourskin.ca](mailto:marianne@saveyourskin.ca) or phone 250-256-6561.

## Participate

Participate in **Move for Melanoma** by forming a team with friends and/or family and encourage others to do the same. Help promote Move for Melanoma by sharing our posts on social media.

---

## Visit

Visit local clinics, community centers and other local community information boards to put up our **posters** & leave **cards** and **brochures**.

---

## Coordinate

Identify and coordinate fundraising opportunities during **sporting events**; raise awareness of skin cancers and ocular melanoma, focusing on education, prevention and the need for improved patient care during the event.

---

## Review

Write a review on our **Facebook page** and on our **Google My Business** listing.

---

## Wear

Wear our **shirts, masks, bags** and **jerseys** while out and about and take pictures for us to share on our social media.

---

## Advocate

Bring government officials' awareness to cancer treatment access in Canada, by providing information about cancer drug trials and new treatment options and **advocating** to decision makers to expedite funding for treatment options and additional research.
